Approved By Daniel Carter, State Purchasing Agent

## ABSTRACT

In an effort to distinguish the Drunk Driving county commitments from other county commitments, this report presents information on recent historical trends in commitments to county facilities for Operating Under the Influence of Alcohol and information on the characteristics of 1984 commitments.

During 1984, 2006 individuals were committed to county facilities for Operating Under the Influence of Alcohol. This is a decrease of 15% from the number committed during 1983. While the number of commitments declined, the median sentence tripled in length from 10 days to 30 days. This situation, somewhat fewer offenders serving considerably longer sentences, seems to support earlier research findings that the number of beds needed to house Operating Under the Influence offenders actually increased from 1983 to 1984.

Over the period 1976 to 1984, county commitments have gone up overall. The county commitments for Operating Under the Influence of Alcohol have risen at a rate considerably faster than the overall rise in commitments. Commitments for Operating Under the Influence of Alcohol rose from 1% of total county commitments in 1976 to 25% by 1983 and dropped to 21% in 1984. The changes in county commitments for Operating Under the Influence of Alcohol varied widely from one county to another.

The typical 1984 commitment for Operating Under the Influence of Alcohol is compared with other county commitments for 1984 using existing data on institution of commitment, month of commitment, sentence, court of commitment, age at commitment, sex, race, marital status and last school grade completed. Commitments for Operating Under the Influence of Alcohol had shorter sentences, were more likely to serve a weekend sentence, were older, more likely to be white, less likely to be single and had more education than did other 1984 county commitments.

The differences in characteristics of the typical offender sentenced for Operating Under the Influence of Alcohol combined with the relatively sustained increase in numbers of these offenders may continue to strain the attempts of the criminal justice system to adjust its strategies to these offenders.

## Introduction

The following is a companion report to Commitments to Massachusetts County Facilities during 1984. Noted in that earlier study was the unique role of commitments to the counties for Operating Under the Influence of Alcohol (OUI) as compared to the total commitments to county jails and houses of correction. The present report first presents data on trends in OUI commitments from 1976 to 1984 and second extracts existing data on OUI commitments in an effort to further explore the role of OUI in the total county commitment picture. Neither of these two reports includes data on commitments to the Massachusetts Department of Correction.

The present report includes information on recent historical trends in OUI commitments to county facilities and information comparing the typical 1984 OUI commitment to the typical 1984 county commitment for all other offenses (excluding OUI). The comparison between 1984 OUI and total 1984 county commitments is made using existing data on institution of commitment, month of commitment, sentence, court of commitment, age at commitment, sex, race, marital status and last school grade completed. These variables are routinely collected for the annual county commitment statistical report and may show important differences between OUI and total county commitments.

### Analysis of Trends\*

This section presents an analysis of trends in OUI commitments from 1976 to 1984. For comparison purposes, trends in total county commitments (including sentences for OUI as well as for other offenses) are examined along with the OUI commitments. Information is included regarding total county commitments, number of OUI commitments, the percentage change from year to year, the percentage of OUI and other offenses to total county commitments and the number of OUI commitments and percentage change from 1983-1984 for each county facility.

These trends show a general rise in total county commitments along with a more dramatic rise in OUI commitments. Over the period 1976-1984, both OUI and total county commitments rose unevenly with only two years (1977 and 1984) where the number of commitments dropped. The percentage of total commitments accounted for by OUI commitments has risen over this period from 1% in 1976 to 25% in 1983, dropping to 21% in 1984. The OUI commitments were found to vary widely from county to county when the 1983 and 1984 figures were compared. These findings are discussed in greater detail below.

During 1984, 2006 individuals were committed to county facilities for OUI. This is a decrease of 15% from the number of OUI commitments during 1983. Figure 1 below illustrates the trend in OUI commitments by year for the past nine

---

\*This discussion of trends owes much to an earlier DOC study: County Commitments for Driving Under the Influence of Alcohol, 1976 to 1983, by Lawrence T. Williams, 1984.

years. While the number of commitments dropped from 1983 to 1984, it should be noted that the 2006 commitments in 1984 are still higher than each year prior to 1983. In comparison, the total number of OUI commitments for the seven year period from 1976 to 1982 totalled only 2029.

Not only has there been a general upward trend in OUI commitments over this time period, but the change in the magnitude of the annual commitments after 1981 has been dramatic. The downward turn from 1983-1984 may prefigure a slight downward trend, a levelling off of OUI commitments, or it may be a temporary drop to be followed by future increases. But whichever of these future trends develops, it seems highly unlikely that the number of county OUI commitments will fall back to earlier levels at any time in the foreseeable future.

Figure 1.  
OUI Commitments  
for 1976 to 1984

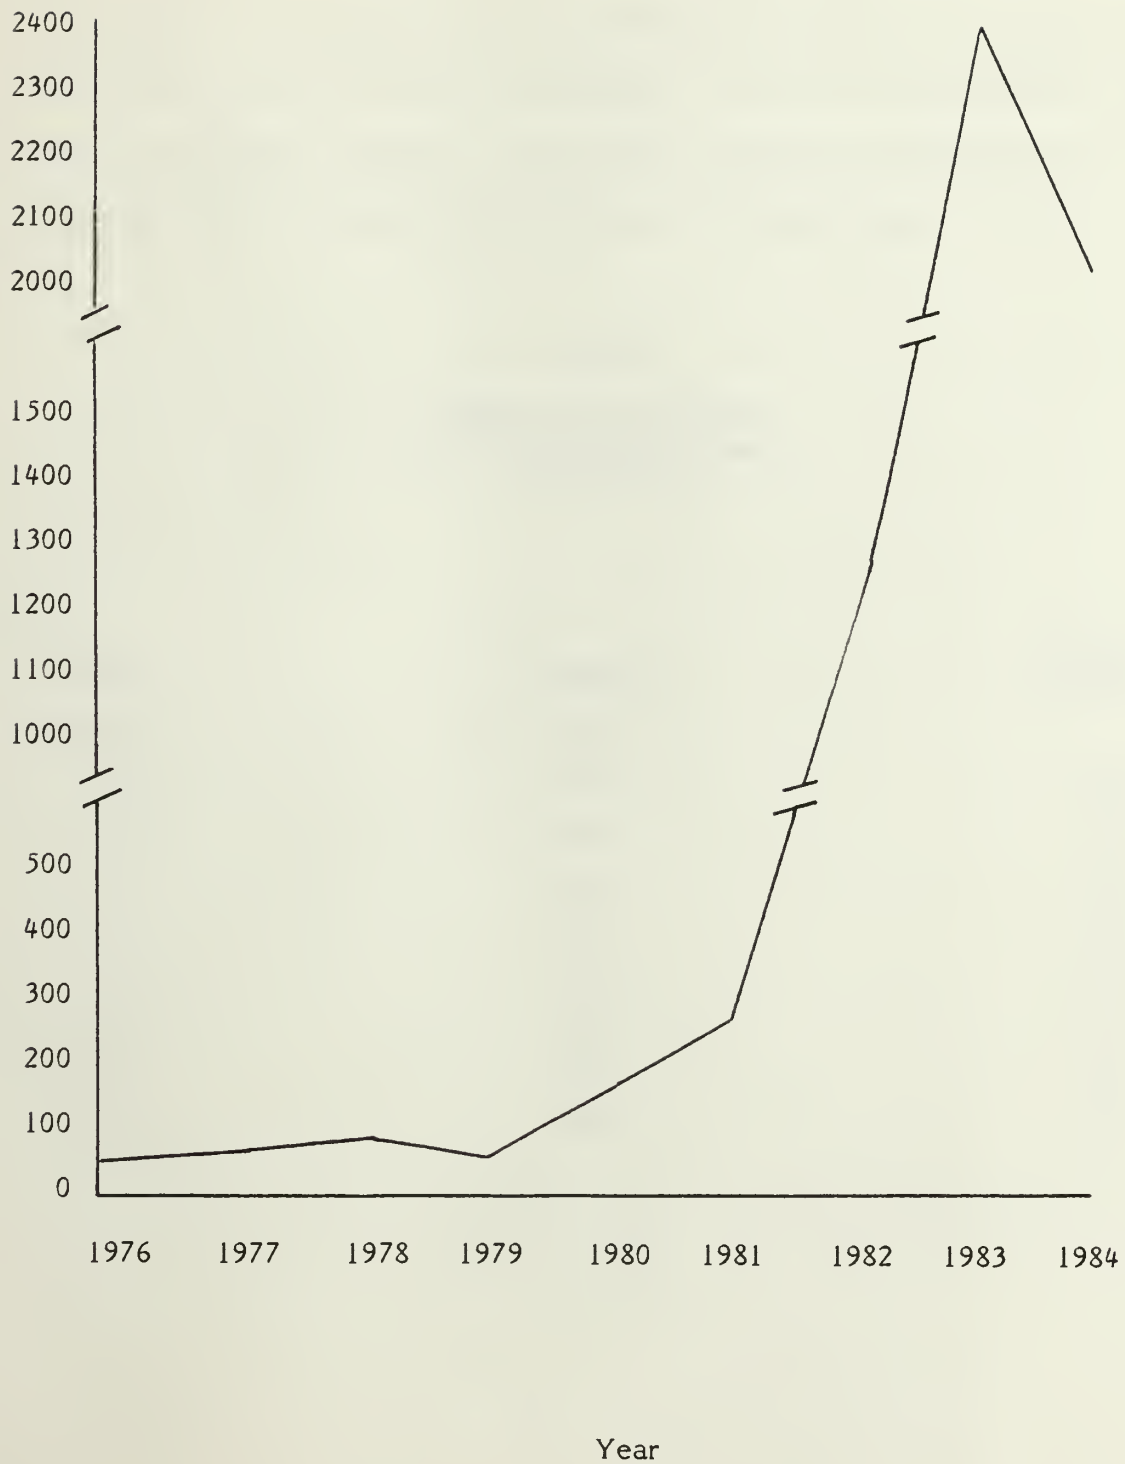

Table 1 presents the total number of county commitments for each year from 1976 to 1984 along with the percentage change for each year. Over the nine year period the number of county commitments increased by 114% from 4393 in 1976 to 9397 in 1984. After a slight decline in 1977, the increase from year to year accelerated fairly steadily. The peak number of commitments was 9617 in 1983, after which there was a 2% decline in 1984 commitments. This is the first decline in total county commitments since 1977. The question now arises whether these trends in total commitments are reflected in trends in OUI commitments.

**Table 1**  
**Percentage Change for**  
**Total County Commitments:**  
**1976-1984**

<u>Year</u>	<u>Number</u>	<u>Percent Change</u>
1976	4393	_____
1977	4169	-5%
1978	4235	+2%
1979	4612	+9%
1980	5441	+18%
1981	6246	+15%
1982	8500	+36%
1983	9617	+13%
1984	9397	-2%

Table 2 presents the number of OUI commitments for each year from 1976 to 1984 along with the percentage change for each year. Over the nine year period the number of OUI commitments increased by 4261% from 46 in 1976 to 2006 in 1984. The increase from year to year was uneven with a general upward trend which had accelerated dramatically since 1981. The largest two increases came from 1981 to 1982 with an increase of 1010 commitments and from 1982 to 1983 with an increase of 1067 commitments. The peak number of commitments was 2372 in 1983. The 15% decline from 1983 to 1984 is only the second decline since 1976.\*

One point worth noting is that the year to year changes in OUI commitments (Table 2) do not strictly parallel the changes in total county commitments (Table 1). For example from 1976 to 1977, total commitments dropped by 5% while OUI commitments rose by 28%. In 1979, by contrast, OUI commitments fell by 18% from the 1978 level while total county commitments rose by 9%. And though total commitments were rising from 1980 through 1983, they were growing at a much slower rate than were the sub-population of OUI commitments.

---

\*One explanation holds that the decline in OUI commitments from 1983 to 1984 "is probably related to the expansion of beds in public health facilities, such as Rutland, to accomodate the convicted second offender drunk driver" ("Recent Trends in OUI commitments," Frank Carney, 1985).

Table 2  
County Commitments for  
Operating Under the Influence:  
1976 - 1984

<u>Year</u>	<u>Number</u>	<u>Percent Change</u>
1976	46	_____
1977	59	+ 28%
1978	73	+ 24%
1979	60	- 18%
1980	191	+ 218%
1981	295	+ 54%
1982	1305	+ 342%
1983	2372	+ 82%
1984	2006	- 15%

Table 3 presents the number of OUI commitments, the number of commitments for other offenses (excluding OUI) and the total of all county commitments for 1976 to 1984. The percentage that OUI made up of all county commitments rose from 1% in 1976 to a high of 25% in 1983. In 1984 OUI made up 21% of all county commitments. This dramatic rise in the percentage of all county commitments that were sentenced for OUI was first evidenced in 1982 when OUI rose from 5% (1981) to 15% (1982) of all county commitments.

While the percentage of the total that is accounted for by OUI commitments did drop slightly from 25% in 1983 to 21% in 1984, the 21% figure is still a higher percentage than any year previous to 1983. Whether a slight downward trend develops or a levelling off occurs of OUI as a percentage of total county commitments, a return to the percentages in evidence in earlier years seems

unlikely. OUI commitments will be likely to continue at one quarter to one sixth of all county commitments.

**Table 3**  
**OUI Commitments and**  
**Other County Commitments**  
**1976 - 1984**

<u>Year</u>	<u>OUI</u> <u>Commitments</u>		<u>Other</u> <u>Commitments</u>		<u>Total</u>
	<u>Number</u>	<u>Percent</u>	<u>Number</u>	<u>Percent</u>	
1976	46	( 1)	4347	(99)	4393
1977	59	( 1)	4110	(99)	4169
1978	73	( 2)	4162	(98)	4235
1979	60	( 1)	4552	(99)	4612
1980	191	( 4)	5250	(96)	5441
1981	295	( 5)	5951	(95)	6246
1982	1305	(15)	7195	(85)	8500
1983	2372	(25)	7245	(75)	9617
1984	2006	(21)	7391	(79)	9397

Table 4 presents the number of OUI commitments and percentage change from 1983 to 1984 for each county. The largest increase in numbers of OUI offenders was at Dedham, where there were 22 more OUI commitments in 1984 than in 1983. Worcester saw the largest decrease, with 146 fewer OUI offenders in 1984. By percentages, Deer Island had the greatest increase, 23% and Northampton the greatest decrease, 45%. Total county OUI commitments saw a 15% decrease from 1983 to 1984, with 366 fewer OUI commitments.

As this table shows, it is important to view the increase in OUI commitments as an unevenly distributed and localized phenomenon. The numbers of offenders and the increase or decrease from 1983-1984 vary widely by county. While a

proportion of the variability in absolute numbers can be attributed to the population size of the county, it should be apparent that population size cannot be the sole reason. And the increases or decreases from 1983-1984 may be due to a wide variety of causes. Both of these issues are subject to changes in public perception, changes in criminal justice procedures, changes in staffing levels and a number of other variables. The impact of any one of these variables must be very different for each individual county.

**Table 4**

<u>Total</u>	<u>2372</u>	<u>2006</u>	<u>- 15%</u>

### Profile of 1984 OUI Commitments

The following section provides information on offenders sentenced to Massachusetts county facilities (jails and houses of correction) during 1984 for OUI in comparison with other 1984 county commitments. This comparison is made using existing data on institution of commitment, month of commitment, sentence, court of commitment, age of commitment, sex, race, marital status and last school grade completed. This summary excludes 74 OUI offenders (70 women and 4 men) committed to the Department of Correction during 1984.

The 1984 OUI commitments were sentenced to houses of correction, served a median sentence of one month and were committed from District rather than Superior Courts. The typical 1984 OUI offender was 28 years old, male, white, single and a high school graduate.

In comparison with other 1984 county commitments, OUI offenders had shorter sentences, were more likely to serve a weekend sentence, were older, more likely to be white, less likely to be single and likely to have more education. The other categories in which comparisons were made, institution, court and sex showed little or no difference. Each of these categories is discussed more fully below.

### Institutions

The data for each institution combined commitments to the county jail and house of correction except for Suffolk County. Deer Island is the Suffolk County

House of Correction and Charles Street is the Suffolk County Jail. Commitments to these two facilities were counted separately. The overwhelming majority of the OUI commitments during 1984 was sentenced to the houses of correction; only 13 were jail commitments, four to Billerica and nine to Charles Street. Over half (52%) of the commitments was sentenced to three institutions: Billerica (29%), Worcester (13%) and Dedham (10%).

### Sentence

Sentences to a county facility may not exceed 2½ years. The median sentence for other 1984 county commitments was 3 months. The median sentence for 1984 OUI commitments was only one month, considerably under the median for other commitments. However, the 1984 OUI median sentence of one month was considerably higher than the median sentence of 10 days during 1983. Recent research on OUI commitments and overcrowding has suggested that the 300% increase in median sentence from 1983 to 1984, has negated any mitigating influence of the 15% drop in commitments. In fact, a net gain from 1983 to 1984 in the number of beds needed to house OUI offenders was shown.\* This increase in sentences from 1983 to 1984 was reflected across the range of sentences: seven day sentences decreased by 53%; two month sentences increased by 33%; six month sentences increased by 16%; and one year sentences increased by 29%.

---

\*Comparisons with 1983 OUI data come from an unpublished memo, "Recent Trends in OUI Commitments" by Frank Carney, 1985.

Of the 2006 OUI offenders, 1709 (35%) were committed for sentences of three months or less, including commitments in lieu of fines. This contrasts with only 55% of other county offenders committed for the same sentence lengths. Of the 2006 OUI commitments, 226 (11%) served weekend sentences, compared to just 2% of other county offenders.

### **Court of Commitment**

Most (99%) of the OUI commitments were sentenced from District Courts, only slightly higher than the 91% of other commitments sentenced from the District Courts.

### **Age at Commitment**

The median age at commitment for 1984 county OUI offenders was 28 years, slightly older than the median of 24 years for other 1984 county commitments.

### **Sex**

The vast majority of OUI commitments was male (99.8%), like the figure for other commitments (99.6%). Only four females were committed to county facilities for OUI during 1984, however seventy female OUI offenders were committed to the Department of Correction.

### Race

Most OUI offenders (92%) were white. Black offenders accounted for 5% and Hispanics (not identified as white or black) for an additional 3%. Other racial categories accounted for only 1 case. For other county offenders, only 73% were white, 17% black and 7% hispanic.

### Marital Status

A majority of OUI offenders (57%) was single. Only 25% were married at the time of commitment to a county facility. In comparison, 72% of other offenders were single and 17% married.

### Last School Grade Completed

The median last grade completed was twelfth. The category of high school graduates alone accounted for 45% of all 1984 OUI commitments. While only 74 offenders (4%) had graduated from college, another 224 (11%) had taken some college courses. For other county commitments, the median last grade completed was eleventh. Only 34% were high school graduates, while 2% were college graduates and 6% had taken some college courses.

### Appendix

Upon referring to the statistical tables in this appendix, the reader should note the following: (1) The total population is sub-divided by committing institution; (2) The top number in each cell represents the total number of offenders committed to a particular institution who fall into the corresponding category in that row of the table; (3) The bottom number in each cell (the number contained in parentheses) is the percentage of the number of individuals in the category to the total number of individuals from that institution (column percents). For example, from Table 4, Month of Commitment (p. 15), the following types of information can be obtained:

- (1) The total number of offenders is broken down by commitment institution, and these are labeled and presented horizontally across the top of the table;
- (2) The specific months are labeled and presented vertically;
- (3) Of the 2006 offenders committed during 1984, 576 were committed to Billerica;
- (4) Of the 576 offenders committed to Billerica, 60 (10%) were committed in January.

These tables were derived from data collected by the Data Processing Unit of the Department of Correction and were produced on the Massachusetts State College Computer Network.

### Abstract

This report presents a statistical description of individuals committed by the courts to county correctional facilities in Massachusetts for Operating Under the Influence of Alcohol (O.U.I.) during 1986. This report also presents some information on trends in commitments for this offense and some comparative information on the O.U.I. population and county offenders committed for other offenses. Some highlights of the information contained in this report are:

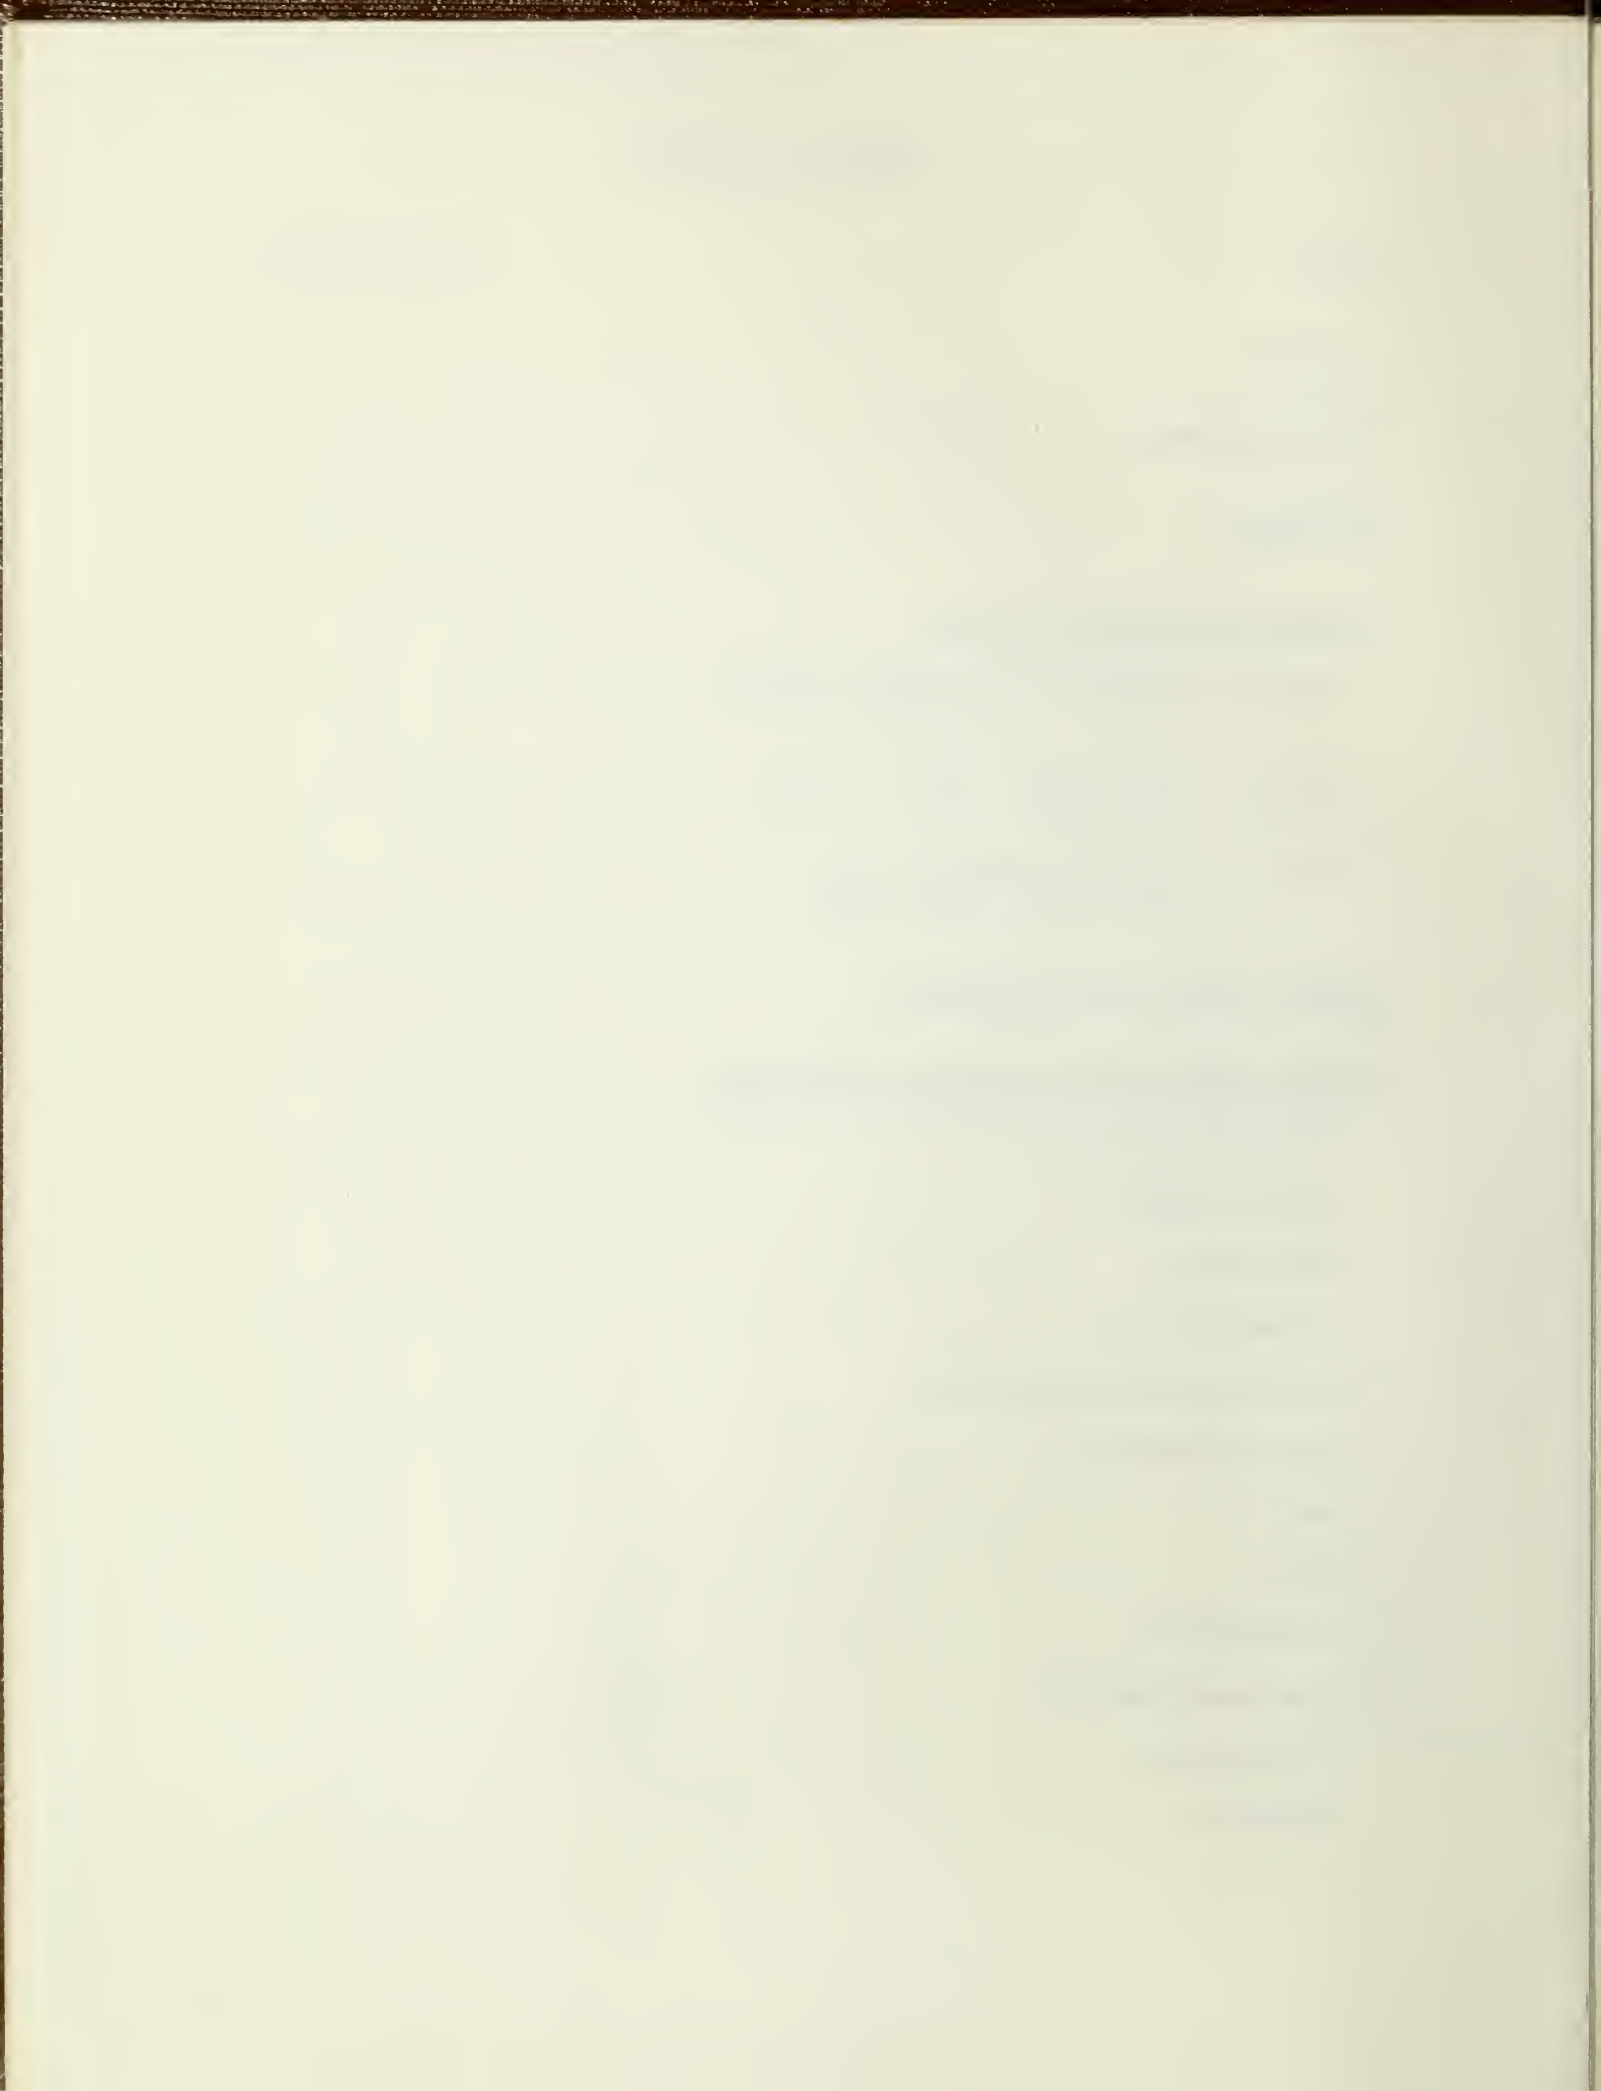

- In 1986 there were 2,687 offenders committed to county facilities for O.U.I. This is an increase of 27 percent or 569 over the 2,118 commitments for O.U.I. in 1985.
- The median sentence length for O.U.I. commitments was 2 months. This is the same as the median sentence length of 1985 commitments. This is more than six times the median sentence length of those committed in 1983 (10 days).
- The 2,687 commitments for O.U.I. represent 26 percent of all offenders committed to the counties in 1986. This is an increase from 1985 when 22 percent of all commitments were for O.U.I.
- Commitments for O.U.I. varied by county. Commitments ranged from 8 percent of all commitments in Suffolk County to 35 percent of all commitments in Norfolk County.
- The typical offender committed for O.U.I. in 1986 was white, 29 years old, male, single and a high school graduate.

## Introduction

Chapter 373 of the Acts of 1982, which became effective on September 1, 1982, increased the certainty and length of punishment for persons convicted of O.U.I. Under the 1982 statute, first time O.U.I. offenders were subject to a period of probation supervision which generally included mandatory participation in a Driver Alcohol Education Program; second offenders received a mandatory minimum sentence of seven days or placement in a 14-day residential alcohol treatment program; and multiple repeat offenders received a mandatory minimum sentence of sixty days. Chapter 620 of the Acts of 1986, which became effective December 18, 1986, further increased the penalties for O.U.I. Following passage of this law, multiple offenders received a mandatory minimum sentence of ninety days.

Ongoing public interest in the issue of drunk driving along with legislative mandates have a tremendous impact on the criminal justice system, particularly the county correctional system, in a short period of time. During 1986, 26 percent of all commitments to the county system were for the offense of O.U.I. This report presents a description of this large and important offender group in the county correctional system. The report first presents data on trends in commitments for this offense for the period 1976 to 1986. The report then presents a **profile** of 1986 commitments for O.U.I. including various characteristics of the present offense and personal background characteristics of these offenders. Comparative information on the O.U.I. offender and offenders committed for other offenses is given as well.

---

I wish to acknowledge the assistance of Keith Obillo in the preparation of this report.

The information in this report was derived from data submitted to the Department by each county correctional facility, collected by the Operations Research Unit of the Department of Correction, and produced on the Regent's Computer Network.

### Trends in Commitments for O.U.I.

This section explores trends in the number of O.U.I. commitments and length of sentence. Table 1 shows commitments to county facilities by offense (O.U.I. and non-O.U.I.) for the ten-year period 1976 to 1986. The table also shows the percentage of O.U.I. and non-O.U.I. commitments and the percent change from the prior year.

As shown in Table 1, there has been a dramatic increase in commitments to county facilities during this period, from 4,393 in 1976 to 10,516 in 1986, an increase of 6,123 or 139 percent. This increase is true of commitments for both O.U.I. and other offenses. Commitments for offenses other than O.U.I. rose by 80 percent, from 4,347 in 1976 to 7,829 in 1986. Commitments for O.U.I. rose more dramatically, from 46 in 1976 to 2,687 in 1986.

While the previous three years, 1983 to 1985, were relatively stable in terms of the number of O.U.I. commitments, the number of commitments for other offenses and the total number of commitments to the county correctional system, in 1986 commitments for O.U.I. and other offenses increased substantially. From 1985 to 1986 commitments for O.U.I. increased from 2,118 to 2,687, an increase of 27 percent. Commitments for all other offenses increased from 7,393 to 7,829, an increase of 6 percent.

The data in Table 1 also demonstrate the continued impact of the O.U.I. population on the county correctional system. During the first six years of the period, O.U.I. offenders accounted for 2 percent of all commitments. During the last five years of the period, O.U.I. offenders accounted for 22 percent of all commitments.

Table 1.  
Commitments to County Facilities  
by Offense, 1976 to 1986

Year	O.U.I.			Other Offense			Total		
	N	(%)	% Change	N	(%)	% Change	N	(%)	% Change

1980	191	(4)	+218%	5250	(96)	+15%	5441	(100)	+18%
1981	295	(5)	+54%	5951	(95)	+13%	6246	(100)	+15%
1982	1305	(15)	+342%	7195	(85)	+21%	8500	(100)	+36%
1983	2372	(25)	+82%	7245	(75)	+1%	9617	(100)	+13%
1984	2006	(21)	-15%	7391	(79)	+2%	9397	(100)	-2%
1985	2118	(22)	+6%	7393	(78)	+0%	9511	(100)	+1%
1986	2687	(26)	+27%	7829	(74)	+6%	10516	(100)	+10%

Table 2 shows recent trends in O.U.I. commitments by the county facility to which the offenders were committed. All counties experienced an increase in O.U.I. commitments during the period 1982 to 1986. The largest increases in commitments occurred in Middlesex County (an increase of 354), Hampden County (an increase of 197), Essex County (an increase of 146), Bristol County (an increase of 136), Norfolk County (an increase of 115), and Worcester County (an increase of 113).

As shown in Table 2, the O.U.I. population varies by county. In 1982 O.U.I. commitments ranged from 4 percent of Deer Island commitments to 32 percent of Essex County (Lawrence) commitments. In 1986 O.U.I. commitments ranged from 3 percent of Charles Street commitments to 35 percent of Norfolk county commitments.

Both the number of offenders being admitted for O.U.I. and the length of sentence will have an impact on the population of the county correctional system. Table 3 shows the sentence length for offenders committed for O.U.I. for the period 1982 to 1986. During this period the median sentence length increased, from less than one month in 1982 and 1983 to one month in 1984 and to two months in 1985 and 1986.

From 1983 to 1986 there has been a shift away from shorter sentences for O.U.I. and a shift toward longer sentences. There has been a 64 percent decrease in seven day sentences, from 882 in 1983 to 319 in 1986; and there has been a 92 percent increase in two month sentences, from 341 in 1983 to 656 in 1986. In 1983, 690 (29 percent) of the O.U.I. offenders received a sentence of two months or longer; in 1984, 931 (46 percent) received a sentence of two months or longer; in 1985, 1089 (51 percent) received a sentence of two months or longer; and in 1986, 1643 (61 percent) received a sentence of two months or longer.

For most of 1986 there was a mandatory minimum sentence of 60 days for multiple O.U.I. offenders. This suggests that by 1986 sixty-one percent of the O.U.I. offenders committed to the county correctional system may be the result of a third conviction for this offense. This trend toward longer sentences is noteworthy because of its likely impact on population in the county system and because individuals with sentences of two months or more are candidates for the specialized O.U.I. treatment programs offered by the Western Massachusetts Correctional Alcohol Center (W.M.C.A.C.) and Longwood Treatment Center. Thus, the continued high number of admissions for O.U.I. combined with an increase in sentence length will contribute to the impact of this offender group on the population in the county correctional system. This trend is likely to continue as increases in mandatory sentence lengths are incorporated into the correctional system.

### Profile of 1986 O.U.I. Commitments

This section provides information on offenders committed to Massachusetts county facilities during 1986 for O.U.I. and compares this population with other 1986 county commitments. This description includes information on the characteristics of the present offense (month in which committed, institution to which committed, court from which committed, sentence length and sentence type) and personal background characteristics of this offender group (age, race, sex, marital status, education, place of birth and residence). The first set of twelve tables that follow this section show information for the O.U.I. population by the institution to which the offender was committed. The second set of tables provides information on the O.U.I. population in comparison with other offenders.

Upon referring to the tables in this section, the reader should note the following: (1) the total population is sub-divided by committing institution or offense group; (2) the top number in each cell represents the total number of offenders who fall into the corresponding category in that row of the tables; (3) the bottom number in each cell (the number contained in parentheses) is the percentage of the number of individuals in the category to the total number of individuals from that group (column percents). For example, from the table on page 14, Month of Commitment is presented and the following types of information can be obtained:

- (1) The total number of offenders is broken down by commitment institution, and these are labeled and presented horizontally across the top of the table;
- (2) The specific months are labeled and presented vertically;
- (3) Of the 2687 O.U.I. offenders committed during 1986, 619 were committed to Middlesex county;
- (4) Of the 619 offenders committed to Middlesex, 55 (9 percent) were committed in January.

### Present Offense Characteristics

**Institution.** The number of commitments for O.U.I. ranged from a low of 6 in Dukes County to a high of 619 in Middlesex County. Proportionally, commitments for O.U.I. ranged from 3 percent of all commitments to Suffolk County/Charles Street to 35 percent of all commitments to Norfolk County.

**Month.** The number of O.U.I. commitments ranged from a low of 190 in July to a high of 255 in September. There was an average of 224 commitments for O.U.I. each month.

**Sentence.** The median sentence length of O.U.I. offenders was two months. Because the law during most of 1986 mandated a sentence of at least 60 days for a third or subsequent conviction for O.U.I., this suggests that the typical O.U.I. offender in the county system may have at least two prior convictions for this offense. This is less than the median sentence of three months for other offenders.

Three percent of all O.U.I. commitments were in lieu of payment of a fine. This contrasts with 15 percent for other offenses. Fines were used most extensively in Barnstable County, where 12 percent of all O.U.I. commitments were in lieu of payment of a fine.

As with commitments for other offenses, O.U.I. commitments are generally to houses of correction and only rarely to jails. Less than one percent (N=6) of all O.U.I. commitments were to jail facilities.

Three percent of all O.U.I. commitments were weekend sentences. This is similar to 2 percent for other offenses. Weekend sentences were used most extensively in Berkshire County where 21 percent of all O.U.I. commitments were weekend sentences.

Court From Which Committed. Like other offenders, O.U.I. offenders are generally sentenced from a lower court in the county of the facility to which they were committed. Less than one percent (N=11) of all O.U.I. commitments were from Superior Courts.

#### Personal Background Characteristics

Age. The age of O.U.I. offenders ranged from 17 to 75 years. The median age of this group was 29 years. This is older than other offenders whose median age was 25 years.

Sex. Of the 2,687 O.U.I. commitments in 1986, there were 2,670 males and 17 females. It is important to note that almost all female offenders are committed to the state correctional facility, MCI-Framingham, and thus are not reflected in this analysis. In 1986 there were an estimated 105 females committed to MCI-Framingham for O.U.I.

Marital Status. Most O.U.I. offenders were single (59 percent). Twenty-three percent were married and 18 percent were separated, divorced or widowed at the time of commitment. This contrasts with other offenders where 73 percent were single, 17 percent were married and 10 percent were separated, divorced or widowed.

Education. The median educational level for O.U.I. offenders was 12th grade. This is slightly higher than other offenders whose median educational level was 11th grade. Seventy-four percent of all O.U.I. offenders had at least a high school level education compared with 47 percent of other offenders.

**Race.** Ninety-three percent of the O.U.I. offenders were white, four percent were black and three percent were hispanic or other races. This contrasts with other offenders who were 73 percent white, 19 percent black and 8 percent hispanic or other races.

**Place of Birth.** Seventy-six percent of all O.U.I. offenders were born in Massachusetts, 16 percent were born in other states, 3 percent in U.S. territories and 5 percent in other countries. Offenders committed for other offenses were somewhat more likely to have been born out of state, 69 percent were born in Massachusetts, 19 percent in other states, 8 percent in U.S. territories, and 4 percent in other countries.

**Residence.** Most O.U.I. offenders resided in the same county as the facility to which they were committed. The proportion of same county O.U.I. offenders ranged from a low of 25 percent of Suffolk/Charles Street O.U.I. offenders to a high of 91 percent of Hampden county O.U.I. offenders.

### **Summary**

The typical O.U.I. offender entering the county correctional system was committed from a district court to serve a two month sentence. This individual was a 29 year old, single, white male with a high school education. O.U.I. offenders had somewhat shorter sentences than other offenders (two months vs. three months). O.U.I. offenders are older on average, more likely to be married or in a state of marital separation than other offenders. The O.U.I. offender is more likely to be white and to have a higher educational level.

Handwritten text, likely bleed-through from the reverse side of the page. The text is arranged in approximately 15 horizontal lines, though it is too faint to transcribe accurately.

Handwritten signature or name at the bottom of the page, possibly reading "William H. Hall".

### Abstract

This report presents a statistical description of individuals committed by the courts to county correctional facilities in Massachusetts for Operating Under the Influence of Alcohol (O.U.I.) during 1987. This report also presents some information on trends in commitments for this offense and some comparative information on the O.U.I. population and county offenders committed for other offenses. Some highlights of the information contained in this report are:

- In 1987, there were 2,607 commitments for O.U.I. in Massachusetts county facilities. This is a decrease of 3 percent or 80 from the 2,687 commitments for O.U.I. in 1986.
- The median sentence length for O.U.I. commitments was 3 months. This is an increase from the median sentence length of 1986 commitments (2 months), and a large increase from the median sentence length of those committed in 1983 (10 days).
- The 2,607 commitments for O.U.I. represent 24 percent of all offenders committed to the counties in 1987. This is a decrease from 1986, when 26 percent of all commitments were for O.U.I.
- Commitments for O.U.I. varied by county. Commitments ranged from ten percent of commitments in Suffolk County to 38 percent of all commitments in Norfolk County.
- The typical offender committed for O.U.I. was white, 29 years old, male, single and a high school graduate.

## Introduction

Chapter 373 of the Acts of 1982, which became effective on September 1, 1982, increased the certainty and severity of punishment for persons convicted of O.U.I. Under the 1982 statute, first time O.U.I. offenders were subject to a period of probation supervision which generally included mandatory participation in a Driver Alcohol Education Program; second offenders received a mandatory minimum sentence of seven days or placement in a 14-day residential alcohol treatment program; and multiple repeat offenders received a mandatory minimum sentence of sixty days. Chapter 620 of the Acts of 1986, which became effective December 18, 1986, further increased the penalties for O.U.I. Following passage of this law, multiple offenders received a mandatory minimum sentence of ninety days.

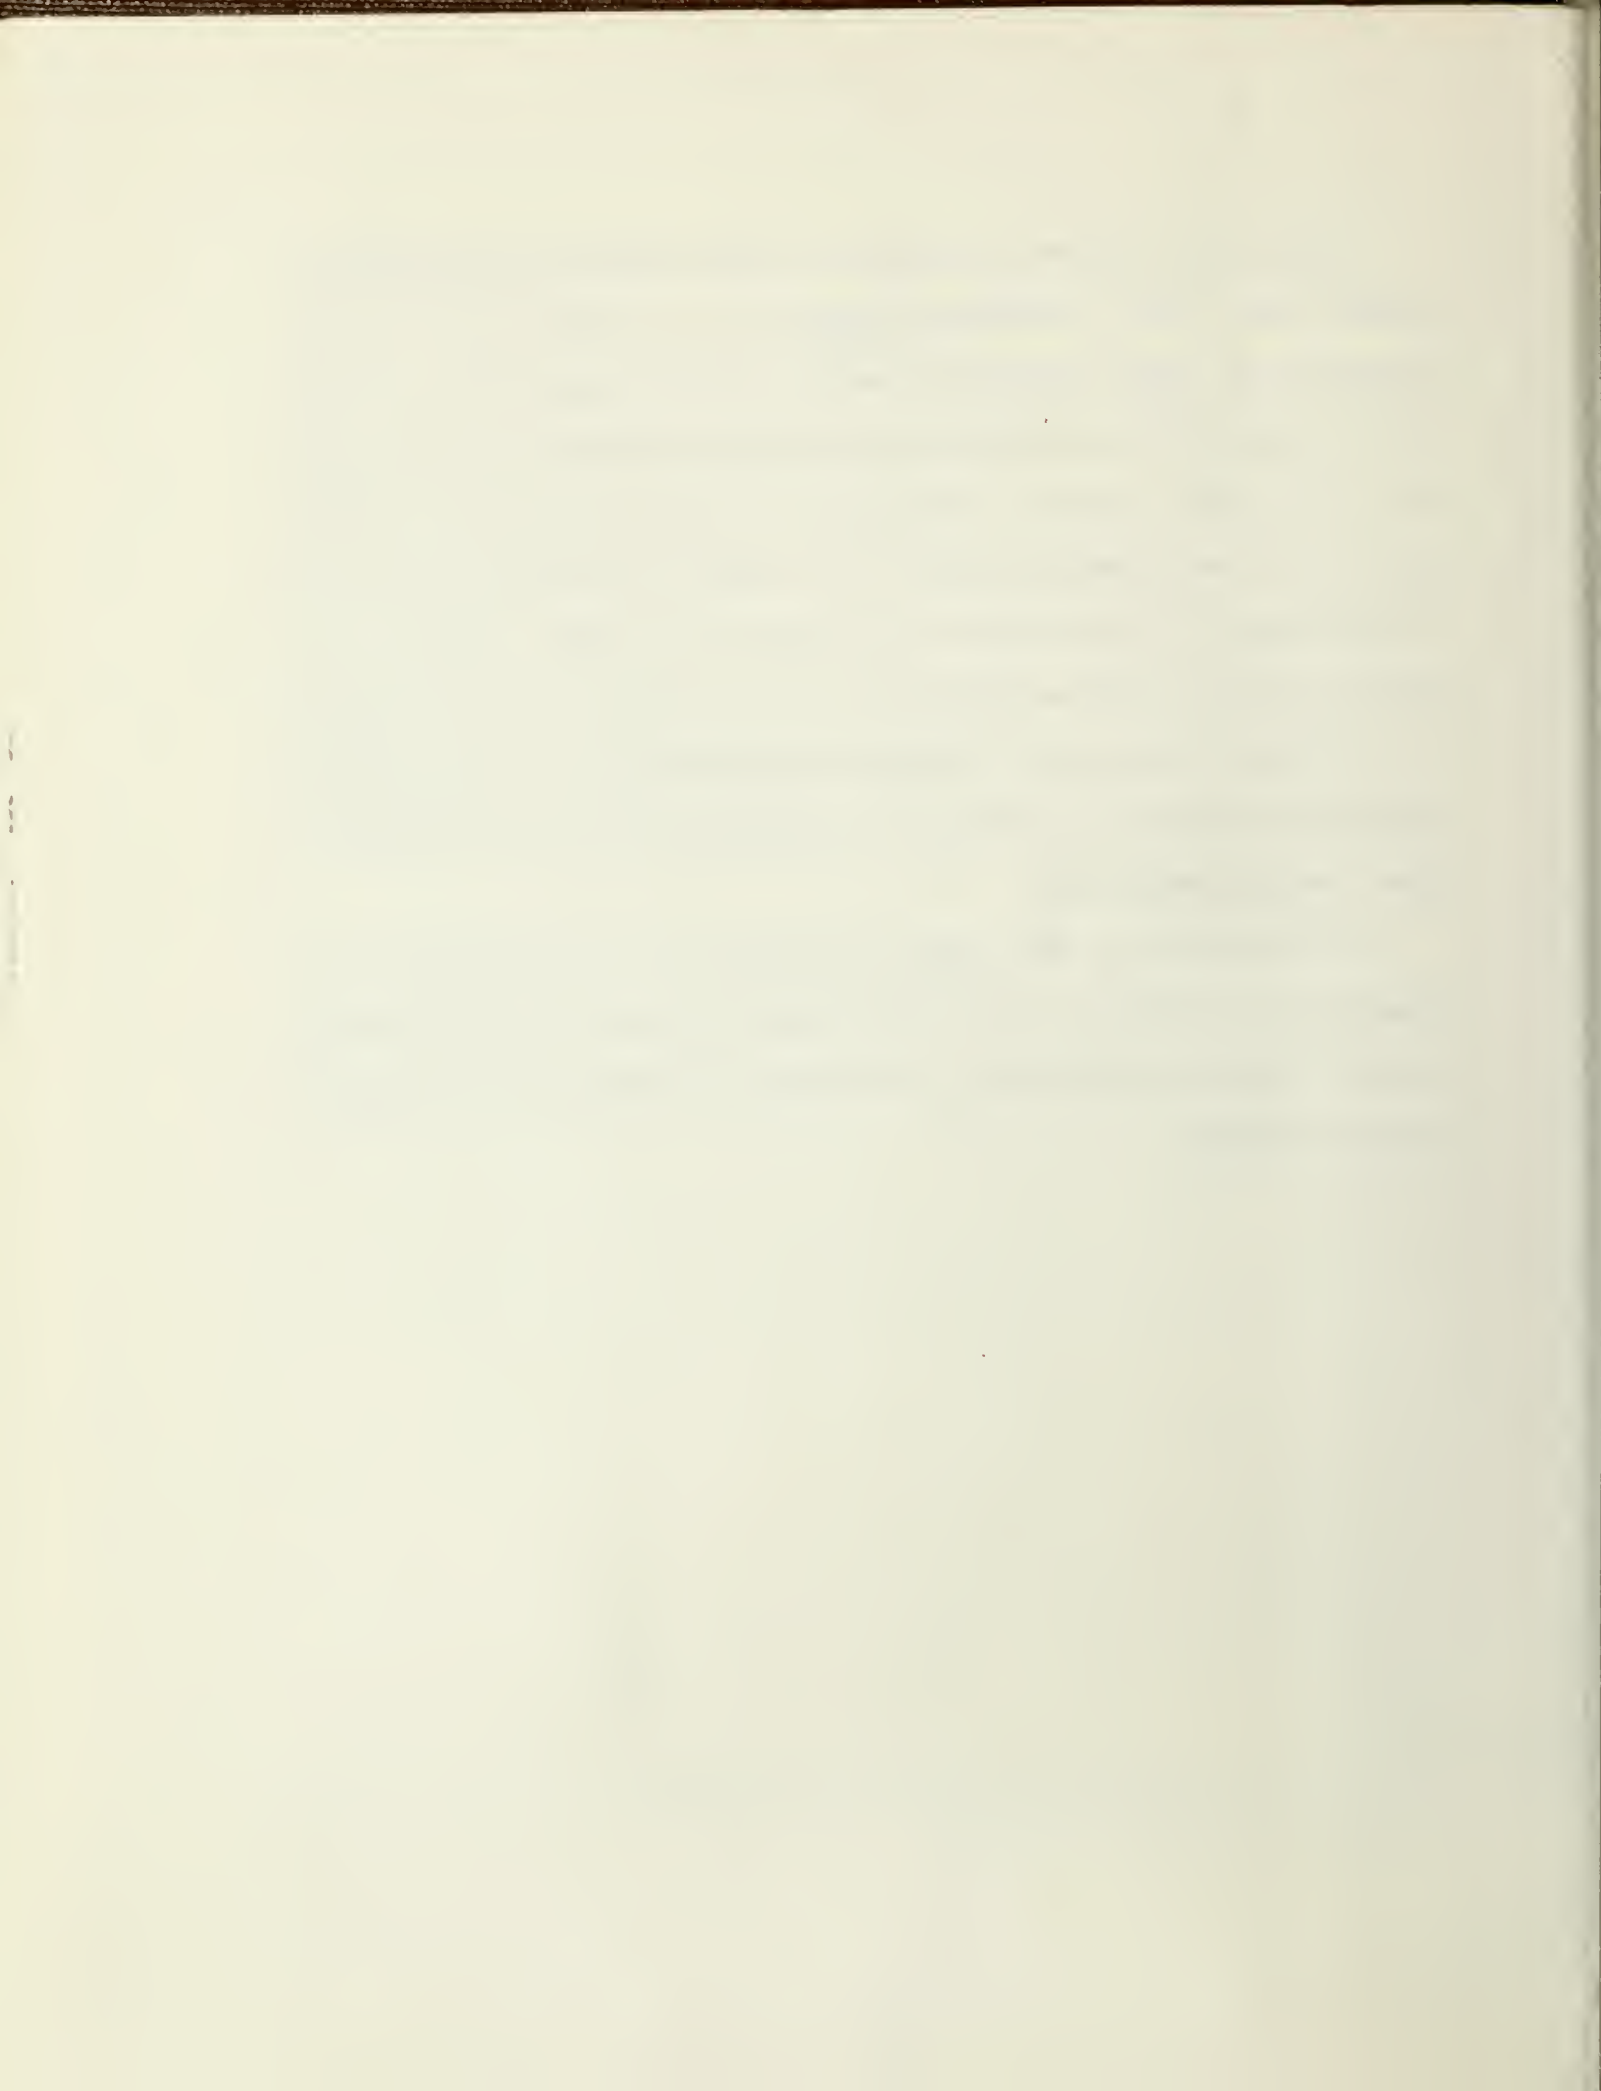

---

The authors would like to acknowledge Ramon Raagas for his assistance in preparing the graphics in this report.

Ongoing public interest in the issue of drunk driving along with legislative mandates have had a tremendous impact on the criminal justice system, particularly the county correctional system, in a short period of time. During 1987, 24 percent of all commitments to the county system were for the offense of O.U.I. This report presents a description of this large and important offender group in the county correctional system. The report first presents data on trends in commitments for this offense for the period 1976 to 1987. The report then presents a profile of 1987 commitments for O.U.I. including various characteristics of the offense and personal background characteristics of these offenders. Comparative information on the O.U.I. offender and offenders committed for other offenses is given as well.

The information in this report was derived from data submitted to the Department by each county correctional facility, collected by the Operations Research Unit of the Department of Correction, and produced on the Regent's Computer Network.

### Trends in Commitments for O.U.I.

This section explores trends in the number of O.U.I. commitments and length of sentence. Table 1 shows commitments to county facilities by offense (O.U.I. and non-O.U.I.) for the eleven-year period 1976 to 1987. The table also shows the percentage of O.U.I. and non-O.U.I. commitments and the percent change from the prior year.

As shown in Table 1, there has been a dramatic increase in commitments to county facilities, from 4,393 in 1976 to 10,818 in 1987, an increase of 6,425 or 146 percent. This increase is true of commitments for both O.U.I. and other offenses. Commitments for offenses other than O.U.I. rose by 89 percent, from 4,347 in 1976 to 8,211 in 1987. Commitments for O.U.I. rose more dramatically, from 46 in 1976 to 2,607 in 1987.

The period 1983 to 1985 was relatively stable in terms of the number of O.U.I. commitments, the number of commitments for other offenses and the total number of commitments to the county correctional system. The years 1986 and 1987 were also similar in terms of the total number of commitments, O.U.I. commitments and commitments for other offenses. In 1987, commitments for O.U.I. decreased by 3% from 1986 figures, while commitments for other offenses increased by 5% from 1986. Overall, commitments increased by 3% from 1986 to 1987.

The data in Table 1 also demonstrates the continued impact of the O.U.I. population on the county correctional system. During the first six years of the period, O.U.I. offenders accounted for 2 percent of all commitments. During the last six years of the period, O.U.I. offenders accounted for 22 percent of all commitments.

Table 1.  
Commitments to County Facilities  
by Offense, 1976 to 1987

1986	2687	(26)	+27%	7829	(74)	+6%	10516	(100)	+10%
1987	2607	(24)	-3%	8211	(76)	+5%	10818	(100)	+3%

Table 2 shows recent trends in O.U.I. commitments by the county facility to which the offenders were committed. All counties experienced an increase in O.U.I. commitments during the period 1982 to 1987. The largest increases in commitments occurred in Middlesex County (an increase of 266), Worcester County (an increase of 204), Bristol County (an increase of 163), Norfolk County (an increase of 140), Hampden County (an increase of 127), and Plymouth County (an increase of 110).

From 1986 to 1987, there was a decline in the number of O.U.I. commitments. Not all counties demonstrated this trend, however. Six counties experienced a decline (Barnstable, Berkshire, Essex, Hampden, Hampshire, and Middlesex). The remaining seven counties experienced an increase in O.U.I. commitments (Bristol, Dukes, Franklin, Norfolk, Plymouth, Suffolk, and Worcester) from 1986 to 1987.

The O.U.I. population varies by county. The number of O.U.I. commitments ranged from 11 in Dukes county to 531 in Middlesex county. The proportion of O.U.I. commitments ranged from 10 percent of Suffolk County commitments to 38 percent of Norfolk county commitments.

Both the number of offenders being admitted for O.U.I. and the length of their sentences will have an impact on the population of the county correctional system. Table 3 shows the sentence length for offenders committed for O.U.I. for the period 1982 to 1987. During this period the median sentence length increased, from less than one month in 1982 and 1983, to one month in 1984, to two months in 1985 and 1986, and to three months in 1987.

As shown in Figure 1, the pattern of sentences for O.U.I. has changed from 1982 to 1987. The use of sentences of less than one month increased from 1982 to 1983, and declined from 1983 through 1987. Sentences of one to two months increased from 1982 through 1986, and declined from 1986 to 1987. Finally, sentences of three months or more increased over the entire period, from 238 in 1982 to 1,466 in 1987. Thus, while the number of commitments for O.U.I. peaked in 1986, changes in sentence length for this group increases the impact of O.U.I. offenders on the county correctional system.

This trend toward longer sentences is noteworthy because of its likely impact on population and programs in the county system. Individuals with sentences of two months or more are candidates for the specialized O.U.I. treatment programs offered by the Western Massachusetts Correctional Alcohol Center (WMCAC), Eastern Massachusetts Correctional Alcohol Center (EMCAC) and Longwood Treatment Center. Thus, the increase in sentence length for O.U.I. combined with the continued high number of admissions will contribute to the impact of this offender group on the population in the county correctional system.

### Profile of 1987 O.U.I. Commitments

This section provides information on offenders committed to Massachusetts county facilities during 1987 for O.U.I. and compares this population with other 1987 county commitments. This description includes information on the characteristics of the present offense (month in which committed, institution to which committed, court from which committed, sentence length and sentence type), and personal background characteristics of this offender group (age, race, sex, marital status, education, place of birth and residence). The first set of twelve tables that follow this section show information for the O.U.I. population by the institution to which the offender was committed. The second set of tables provides information on the O.U.I. population in comparison with other offenders.

Upon referring to the tables in this section, the reader should note the following: (1) the total population is sub-divided by committing institution or offense group; (2) the top number in each cell represents the total number of offenders who fall into the corresponding category in that row of the tables; (3) the bottom number in each cell (the number contained in parentheses) is the percentage of the number of individuals in the category to the total number of individuals from that group (column percent). For example, from the table on page 15 , Month of Commitment is presented and the following types of information can be obtained:

- (1) The total number of offenders is broken down by commitment institution, and these are labeled and presented horizontally across the top of the table;
- (2) The specific months are labeled and presented vertically;
- (3) Of the 2607 O.U.I. offenders committed during 1987, 531 were committed to Middlesex county;
- (4) Of the 531 offenders committed to Middlesex, 57 (11 percent) were committed in January.

## Present Offense Characteristics

**Institution.** The number of commitments for O.U.I. ranged from a low of 11 in Dukes County to a high of 531 in Middlesex County. Proportionally, commitments for O.U.I. ranged from 10 percent of all commitments to Suffolk County to 38 percent of all commitments to Norfolk County.

**Month.** The number of O.U.I. commitments ranged from a low of 164 in June to a high of 294 in January. There was an average of 217 commitments for O.U.I. each month.

**Sentence.** The median sentence length of O.U.I. offenders was three months. This is the same as the median sentence of three months for other offenders.

Three percent of all O.U.I. commitments were incarcerated in lieu of payment of a fine. This contrasts with 14 percent for other offenses. Fines were used most extensively in Dukes County, where 9 percent of all O.U.I. commitments were incarcerated in lieu of payment of a fine.

As with commitments for other offenses, O.U.I. commitments are generally to houses of correction and only rarely to jails. Less than one percent (N=5) of all O.U.I. commitments were to jail facilities.

One percent of all O.U.I. commitments were weekend sentences. This is similar to other offenses. Weekend sentences were used most extensively in Hampshire County where 5 percent of all O.U.I. commitments were weekend sentences.

**Court From Which Committed.** Like other offenders, O.U.I. offenders are generally sentenced from a lower court in the county of the facility to which they were committed. Less than one percent (N=6) of all O.U.I. commitments were from Superior Courts.

### **Personal Background Characteristics**

**Age.** The age of O.U.I. offenders ranged from 17 to 71 years. The median age of this group was 29 years. This is older than other offenders whose median age was 25 years.

**Sex.** Of the 2,607 O.U.I. commitments in 1987, there were 2,599 males and 8 females. It is important to note that almost all female offenders are committed to the state correctional facility, MCI-Framingham, and thus are not reflected in this analysis. In 1987, there were an estimated 99 females committed to MCI-Framingham for O.U.I.

**Marital Status.** Most O.U.I. offenders were single (60 percent). Twenty-one percent were married and 19 percent were separated, divorced or widowed at the time of commitment. This contrasts with other offenders where 74 percent were single, 16 percent were married and 10 percent were separated, divorced or widowed.

**Education.** The median educational level for O.U.I. offenders was 12th grade. This is higher than other offenders whose median educational level was 11th grade. Sixty-four percent of all O.U.I. offenders were at least high school graduates compared with 47 percent of other offenders.

**Race.** Ninety-three percent of the O.U.I. offenders were white, four percent were black and three percent were Hispanic or other races. This contrasts with other offenders who were 70 percent white, 20 percent black and 10 percent Hispanic or other races.

**Place of Birth.** Seventy-nine percent of all O.U.I. offenders were born in Massachusetts, 14 percent were born in other states, 3 percent in U.S. territories and 4 percent in other countries. Offenders committed for other offenses were somewhat more likely to have been born out of state, 68 percent were born in Massachusetts, 19 percent in other states, 9 percent in U.S. territories, and 4 percent in other countries.

**Residence.** As reported by the county facilities, most O.U.I. offenders resided in the same county as the facility to which they were committed. The proportion of same county O.U.I. offenders ranged from a low of 61 percent of Franklin county O.U.I. offenders to a high of 95 percent of Berkshire county O.U.I. offenders.

**Summary** The typical O.U.I. offender entering the county correctional system was committed from a district court to serve a three month sentence. This individual was a 29 year old, single, white male with a high school education. O.U.I. offenders and other offenders had similar sentences (three months). O.U.I. offenders were older on average, more likely to be married or in a state of marital separation than other offenders. The O.U.I. offender was more likely to be white and to have a higher educational level.
